FENDER MOUNT SUPPORTS

WHEN YOU CHOOSE A SPRAY MASTER FENDER YOU HAVE TWO MOUNT SUPPORT OPTIONS

MADE IN THE U.S.A. TRAMEC.COM

SlideTrax MOUNT SUPPORTS

- **Faster, drill-free installation** – save money on installation and get on the road faster
- **High impact composite clamps** adjust along a notched channel on both sides of the fender
- **Adjustable Mounting Channel for simple, mistake-proof alignment** – simply slide the clamp into the desired mount location within the channel and lock it in place with a firm push

EASY TO INSTALL TIRE CHAINS, MAKE REPAIRS, OR PERFORM ROUTINE MAINTENANCE

Simply loosen 4 set screws (1 on each support) and slide off the round post

STATIONARY MOUNT SUPPORTS

- **Two-piece, injection-molded mount support** packaged separately from the fender
- Maximizes installation accuracy by allowing the installer to mount them in the **exact location** required
- Supports attached using a set of four bolts, nuts and washers for a **snug and secure fit**
- The bottom portion of the two-piece support fits within the molded ribs on the underside of the fender and **acts like a safeguard** to prevent the bolts pulling through the fender

- **Top mounted piece** accepts the tube that attaches to the frame rail

MORE ON SLIDETRAX...

SlideTrax
The Quickest, Most Efficient Fender Mounting System

Slidetrax Clamp Channel covers the radius of the fenders for quick installation with no drilling – up to 10X faster depending on the fender model!

1 - Easily slide the clamp along the notched channel to desired mount location

2 - Lock into teeth with a firm push

3 - Insert t-nut, slide fender onto post and tighten set screw
