MAXXGRIP™ CRANK HANDLE

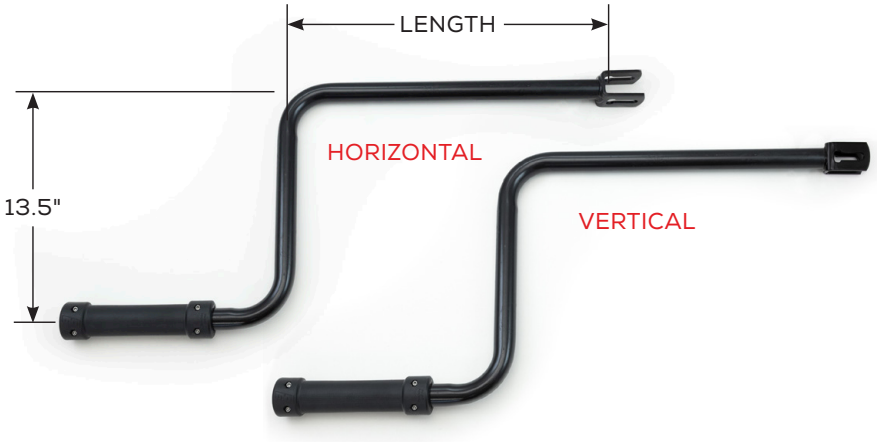
BUILT FOR THE ROAD. DESIGNED FOR YOUR HANDS. A BETTER GRIP FOR A TOUGHER JOB.

When it comes to landing gear, every turn counts. This unique landing gear crank handle is designed with truckers in mind, combining rugged durability with a comfortable, controlled grip.

Unlike traditional crank handles with cold, hard steel grips, this handle features a durable poly composite grip engineered to withstand harsh road conditions and prolong the life of the handle. The result is a grip that's easier on your hands and built to perform in demanding environments.

- Industry's first durable poly composite grip designed for harsh road conditions
- Textured grip end for comfort over standard steel versions with an 8" length designed for easy two-handed operation
- Built-in drain slots to avoid water buildup
- Stainless steel fasteners to resist corrosion
- Helps reduce direct contact with cold or uncomfortable metal
- **MADE IN USA!**

Crank handle assembly is US Patent 12,045,077



MAXIMUM GRIP SPACE
for easy two-handed operation

The **MAXXGrip Crank Handle Grip** features an extended design that accommodates gloved hands for easier turning and enhanced control. As the **industry's first** durable poly grip, it combines rugged durability with a comfortable, secure hold built for demanding road conditions.
