FleetSet™

SERIES 3

3-IN-1 KITS DESIGNED FOR HIGH-PERFORMANCE FLEETS

Tramec Sloan's Series 3 FleetSet features upgrades that fleets demand and delivers performance that fleets deserve.

FleetSets are a complete air & electric tractor-trailer connection system that maximizes braking performance and lowers life-cycle costs.

Easy installation right out of the box! FleetSets are packaged in a premium, easy-to-carry retail display box which includes all the components for a quick tractor-to-trailer connection:

- Premium 3-in-1 Spiral Wrap:
 - Red & Blue Hoses
 - Sonogrip® ABS Cable
 - Anodized Gladhands
 - X31G Hose Grips
- X31C Wide Body Clamp (2x)
- X31HT Tender Spring (2x)

5-YEAR WARRANTY

The FleetSet Series 3 features a 5-Year Limited Warranty for parts & workmanship. Visit hd.tramec.com/terms for full details

BEST-IN-CLASS SUPPORT SYSTEM:

X31C WIDE BODY CLAMP

This heavy duty clamp for 3-in-1s was designed for durability and ease of use. No tools are required for this 100% corrosion-free clamp. Made in the USA!

X31HT HIGH TENSION SPRING

An industry first, Tramec Sloan's new X31HT tender spring provides superior support for heavier lines. Our robust design ensures the spring will always "snap-back" from tight turns and prevents "sag and snag" failures.

PREMIUM WRAP FEATURES:

1. ANODIZED GLADHANDS

Featuring anodized bodies with stainless steel hardware and poly seals, these gladhands offer superior corrosion & salt spray resistance in the most extreme weather conditions

2. X31G HOSE GRIPS

Tramec Sloan's solution to prevent hose kinks, these flexible, oversized grips are ergonomically designed with the driver in mind. Optimized grip size maximizes connection leverage.

3. SONOGRIP® ABS CABLE

For ultimate performance, choose Tramec Sloan's Sonogrip®. Designed for long-lasting, corrosion-free connections, the solid-molded plug body prevents moisture ingress and ultrasonic welded terminals secure critical connection points for the long-haul. The uniquely angled "pistol-grip" design reduces cable stress, a critical need to extend cable life.

4. SPIRAL WRAPPED LINES

Spiral wrapped hoses and cable are protected from chafing and other damage while being kept organized and tangle free. Plus, red and blue hoses make lines instantly identifiable.

A TRAMEC COMPANY

Tramec Sloan has been manufacturing high quality truck & trailer components in the U.S. for over 50 years.

We're proud to be a top OEM and Aftermarket choice for our air brake, electrical, and brass components.
