AEROFLAP MUD FLAPS

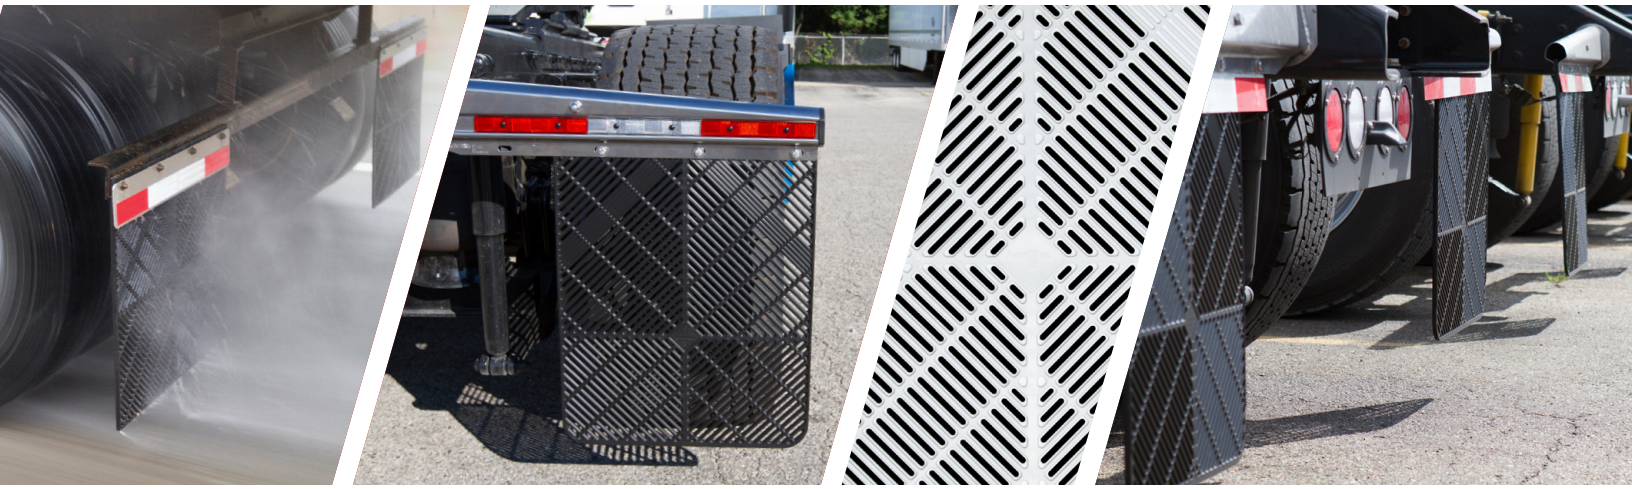

AeroFlap® AERODYNAMIC MUD FLAPS

When the safety and efficiency of your operation is at stake, more fleet operators trust **AeroFlap**. The drag from traditional mudflaps literally fights your truck's ability to move down the road, acting like a set of parachutes dragging behind your rig. Designed for fuel-efficiency and safety, the AeroFlap's innovative design breaks up the trailing air vortex to reduce vehicle drag and reduce spray.

- Saves fuel by reducing drag
- Reduced spray increases visibility creating a safer environment for drivers and other motorists
- Eliminates need for anti-sail brackets due to the way the air is channeled and how it breaks up the trailing air vortex
- Open design vents excess heat away from wheels and brake systems, which reduces maintenance costs

Effective **Spray Control** is **Vital** for your Fleet!

AF-24 AEROFLAP SERIES
FOR TRADITIONAL DUAL TIRES

- Best choice for full coverage spray control with traditional dual tire configurations
- All AF-24 models are 24" wide and available in lengths of 24", 30" and 36"

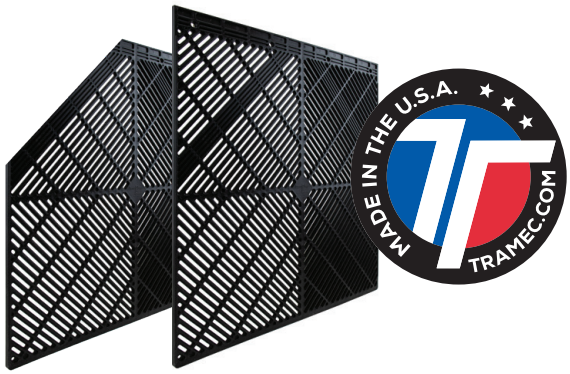

AF-19 AEROFLAP SERIES
FOR MODERN WIDE-BASE TIRES

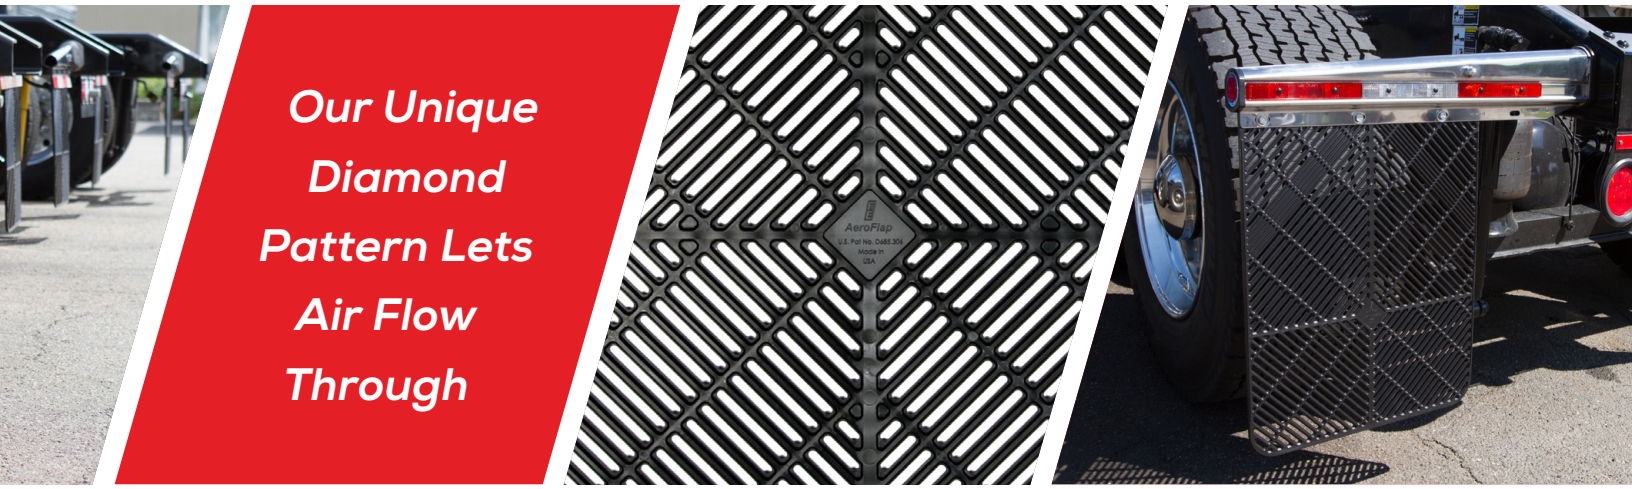

- Perfect fit for your super single wide-base tires
- Many fleets are replacing their dual tires with wide-base tires for added fuel economy and stability
- National Transportation Research Laboratory (ORNL) testing showed gas mileage increased nearly 3% with the use of the wider single tires
- All AF-19 models are 19" wide and available in 24" and 30" lengths

CUSTOMIZE FOR YOUR NEEDS

- Designed to be easily cut-down for angled mud flap brackets
- All flaps are symmetrical (non-handed) for use curbside or roadside
- Other colors available upon request with minimum order commitments

FLEET ENGINEERS has been designing and manufacturing products for the Heavy Duty vehicle industry for over 60 years. Fleet Engineers is part of the **Tramec** family along with Tramec Sloan and Penz Products.

We strive to provide quality products with great service at an exceptional value for our customers.
